

C-mulatorTM

A carbon footprint simulation tool

Make Sustainability Your Sales Superpower.

Show Real Impact with Real Data

Forget vague green claims-- showcase your material's measurable carbon savings in real time. The C-mulatorTM provides precise, data-backed insights to help your team transform sustainability metrics into a compelling sales pitch.

Build Bridges Across Departments

With the C-mulatorTM, sustainability managers can empower marketing and sales departments to use sustainability as a selling point, providing the tools they need to win over new customers.

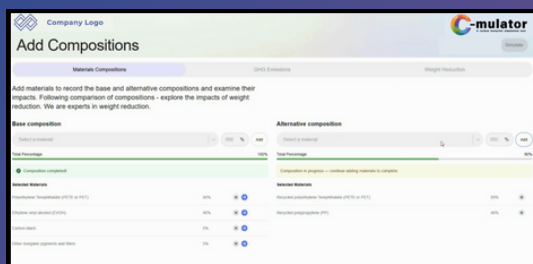

Showcase Your Competitive Advantage

The C-mulatorTM empowers you to showcase how your material choices outperform competitors in terms of carbon impact and transparency with interactive benchmarking and precise data visualization.

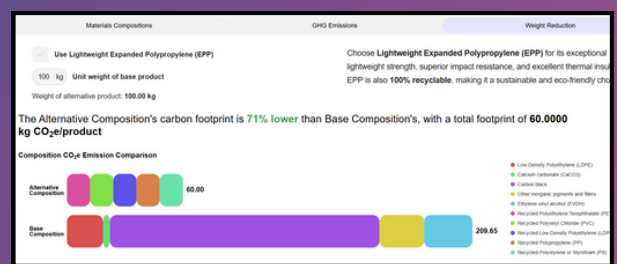

Gamified Sustainability Insights

The C-mulatorTM turns sustainability into an interactive experience. Simulate material changes and instantly see their carbon impact in an intuitive, visually engaging way, making sustainable choices tangible, relatable and fun.

Build base and alternative compositions from a bank of raw material inputs

Compare the carbon footprints of the two compositions
